Functional & Performance Games Test Execution

ID	TITLE	DESCRIPTION	PRECONDITIONS	DATA	STEPS	EXPECTED RESULT	POST CONDITIONS	STATUS	PRIORITY
TBP - 001	The Battle of Polytopia - Entrypoint Tab Visibility	Verify that the Entrypoint tab is correctly visible when opening the game	1. Android version 13-16 2. Game installed from the Play Store 3. Tab enabled	1. User previously logged in from the Play Store.	1. Open the Play Store. 2. Search for The Battle of Polytopia. 3. Install The Battle of Polytopia. 4. Open The Battle of Polytopia. 5. Wait for the main menu to load. 6. Verify that the Entrypoint Tab is visible on the right or left edge.	The Entrypoint Tab is fully visible, not partially hidden, and remains fixed without unexpected movements.	The Entrypoint remains visible and stable during the initial game session.	Step/Failure/Blocked	High
TBP - 002	The Battle of Polytopia - Opening the Overlay via Entrypoint	Verify that the Entrypoint tab correctly opens the overlay when swiped.	1. Android version 13-16 2. Game installed from the Play Store 3. Tab enabled	1. User previously logged in from the Play Store.	1. Open The Battle of Polytopia. 2. Wait for the main menu to load. 3. Verify that the Entrypoint Tab is visible on the right or left edge. 4. Swipe the Entrypoint Tab to open the overlay. 5. Verify that it does not activate the "Back" gesture. 6. Observe the opening animation. 7. Verify that the opening animation is smooth. 8. Verify that the widgets are correctly aligned and not distorted.	The overlay opens smoothly when you swipe the Tab, without triggering the Back gesture. The widgets appear correctly aligned and without distortion.	The overlay remains functional and stable after opening.	Step/Failure/Blocked	High
TBP - 003	The Battle of Polytopia - Gemini Live Activation	Verify that Gemini Live can be activated correctly and responds appropriately to a query about the screen.	1. Android version 13-16 2. Game installed from the Play Store 3. Tab enabled	1. User previously logged in from the Play Store.	1. Open The Battle of Polytopia. 2. Wait for the main menu to load. 3. Verify that the Entrypoint Tab is visible on the right or left edge. 4. Slide the Entrypoint Tab to open the overlay. 5. Activate the "Gemini Live" option. 6. Confirm that the microphone/listening indicator is working correctly. 7. Ask: "What's on the screen right now?" 8. Listen to the response provided by Gemini Live.	Gemeni Live activates correctly without errors; the system recognizes the voice and responds consistently with the content displayed on the game screen.	Gemini Live remains active and functional within the overlay.	Step/Failure/Blocked	High
TBP - 004	The Battle of Polytopia - Performance during gameplay with Gemini Live active	Verify game performance while Gemini Live remains active during continuous gameplay.	1. Android version 13-16 2. Game installed from the Play Store 3. Tab enabled 4. Gemini Live activated	1. User previously logged in from the Play Store.	1. Open The Battle of Polytopia. 2. Wait for the main menu to load. 3. Verify that the Entrypoint Tab is visible on the right or left edge. 4. Swipe the Entrypoint Tab to open the overlay. 5. Activate the "Gemini Live" option. 6. Start a game. 7. Play for 2 continuous minutes. 8. Perform gameplay actions (move units, explore the map). 9. Evaluate touch response and loading times.	The game remained stable for the full 2 minutes. There was no severe lag or freezing during gameplay. Gemini Live remained active without unexpectedly closing.	The game continues to function correctly after the stress test is completed.	Step/Failure/Blocked	High

GS - 001	Gardenscapes - Entrypoint Tab Visibility	Verify that the Entrypoint Tab is correctly visible when opening the game.	1. Android version 13-16 2. Game installed from the Play Store 3. Tab enabled	1. User previously logged in from the Play Store.	1. Open the Play Store. 2. Search for Gardenscapes. 3. Install Gardenscapes. 4. Open the game. 5. Wait for the main menu to load. 6. Verify that the Entrypoint Tab is visible on the right or left edge. 7. Confirm that it is not partially hidden or moving unexpectedly.	The Entrypoint Tab is fully visible when starting the game; it is not partially hidden and remains fixed without unexpected movements.	The Entrypoint remains visible and stable during the initial game session.	Step/Failure/Blocked	High
GS - 002	Gardenscapes - Opening the Overlay via Entrypoint	Verify that the Entrypoint Tab correctly opens the overlay when swiped.	1. Android version 13-16 2. Game installed from the Play Store 3. Tab enabled	1. User previously logged in from the Play Store.	1. Open Gardenscapes. 2. Wait for the main menu to load. 3. Verify that the Entrypoint Tab is visible. 4. Swipe the Tab to the left to open the overlay. 5. Verify that the "Back" gesture is not accidentally activated. 6. Ensure that the opening animation is smooth (without jitter or severe lag). 7. Verify that the widgets are correctly aligned and not distorted.	The overlay opens smoothly when you swipe the Tab, without triggering the Back gesture. The widgets appear correctly aligned and without distortion.	The overlay remains functional and stable after opening.	Step/Failure/Blocked	High
GS - 003	Gardenscapes - Gemini Live Activation	Verify that Gemini Live can be activated correctly and respond appropriately to a query about the screen.	1. Android version 13-16 2. Game installed from the Play Store 3. Tab enabled	1. User previously logged in from the Play Store.	1. Open Gardenscapes. 2. Wait for the main menu to load. 3. Verify that the Entrypoint Tab is visible. 4. Open the overlay by sliding the Tab. 5. Activate the "Gemini Live" option. 6. Confirm that the listening indicator is active. 7. Ask: "What's on the screen right now?" 8. Listen to the response provided by Gemini Live.	Gemini Live activates successfully, recognizes voice, and provides a coherent response related to the visible content.	Gemini Live remains active and functional within the overlay.	Step/Failure/Blocked	High
GS - 004	Gardenscapes - Performance with active Gemini Live	Verify game performance while Gemini Live remains active during continuous gameplay.	1. Android version 13-16 2. Game installed from the Play Store 3. Tab enabled 4. Gemini Live activated	1. User previously logged in from the Play Store.	1. Open Gardescapes. 2. Wait for the main menu to load. 3. Verify that the Entrypoint Tab is visible on the right or left edge. 4. Swipe the Entrypoint Tab to open the overlay. 5. Activate the "Gemini Live" option. 6. Start a game. 7. Play for 2 continuous minutes. 8. Perform gameplay actions (move units, explore the map). 9. Evaluate touch response and loading times.	The game remained stable for the entire 2 minutes. There was no severe lag or freezing. Gemini Live stayed active without closing unexpectedly.	The game continues to function normally after the test ends.	Step/Failure/Blocked	High
AB2 - 001	Angry Birds 2 – Entrypoint Tab Visibility	Verify that the Entrypoint Tab is correctly visible when opening the game.	1. Android version 13-16 2. Game installed from the Play Store 3. Tab enabled	1. User previously logged in from the Play Store.	1. Open the Play Store. 2. Search for Angry Birds 2. 3. Install Angry Birds 2 (if it's not already installed). 4. Open the game. 5. Wait for the main menu to load. 6. Verify that the Entrypoint Tab is visible on the right or left edge. 7. Confirm that it is not partially hidden or moving unexpectedly.	The Entrypoint Tab is fully visible when starting the game; it is not partially hidden and remains fixed without unexpected movements.	The Entrypoint remains visible and stable during the initial game session.	Step/Failure/Blocked	High

AB2 - 002	Angry Birds 2 - Opening the Overlay via Entrypoint	Verify that the Entrypoint Tab correctly opens the overlay when swiped.	1. Android version 13-16 2. Game installed from the Play Store 3. Tab enabled	1. User previously logged in from the Play Store.	1. Open Angry Birds 2. 2. Wait for the main menu to load or a level to start. 3. Verify that the Entrypoint Tab is visible. 4. Swipe the Tab to the left to open the overlay. 5. Verify that the "Back" gesture is not accidentally activated. 6. Ensure that the opening animation is smooth (without jitter or severe lag). 7. Verify that the widgets are correctly aligned and not distorted.	The overlay opens smoothly when you swipe the Tab, without triggering the Back gesture. The widgets appear correctly aligned and without distortion.	The overlay remains functional and stable after opening.	Step/Failure/Blocked	High
AB2 - 003	Angry Birds 2 - Gemini Live Activation	Verify that Gemini Live can be activated correctly and respond appropriately to a query about the screen.	1. Android version 13-16 2. Game installed from the Play Store 3. Tab enabled	1. User previously logged in from the Play Store.	1. Open Angry Birds 2. 2. Wait for the main menu to load. 3. Verify that the Entrypoint Tab is visible. 4. Open the overlay by sliding the Tab. 5. Activate the "Gemini Live" option. 6. Confirm that the listening indicator is active. 7. Ask: "What's on the screen right now?" 8. Listen to the response provided by Gemini Live.	Gemini Live activates correctly, recognizes the voice, and provides a coherent response related to the visible content (birds, colors, interface, active level).	Gemini Live remains active and functional within the overlay.	Step/Failure/Blocked	High
AB2 - 004	Angry Birds 2 - Performance with active Gemini Live	Verify game performance while Gemini Live remains active during continuous gameplay.	1. Android version 13-16 2. Game installed from the Play Store 3. Tab enabled 4. Gemini Live activated	1. User previously logged in from the Play Store.	1. Open Angry Birds. 2. Wait for the main menu to load. 3. Verify that the Entrypoint Tab is visible on the right or left edge. 4. Swipe the Entrypoint Tab to open the overlay. 5. Activate the "Gemini Live" option. 6. Start a game. 7. Play for 2 continuous minutes. 8. Perform gameplay actions (move units, explore the map). 9. Evaluate touch response and loading times.	The game remained stable for the entire 2 minutes. There was no severe lag or freezing. Gemini Live stayed active without closing unexpectedly.	The game continues to function normally after the stress test is completed.	Step/Failure/Blocked	High
